SESSION REGISTRATION FORM
Digital WINNER-conference
10 - 12 October 2023

In WINNER - the *Week of Indonesia – Netherlands Education and Research* - you have the chance to interact with researchers, practitioners, policy makers and the private sector. WINNER is a unique opportunity to deepen and expand your collaboration on the Indonesian-Dutch playing field and to share your knowledge, experience and vision on bilateral collaboration.

The theme for WINNER 2023 is "Enhancing knowledge connectivity of research and education between Indonesia and the Netherlands for regional impact".

This year's theme encompasses a multitude of collaborations and questions, in fundamental and applied sciences, in natural, social, technical and health sciences and humanities, and between academics, businesses, NGOs and public organisations. It continues to emphasize the need for interdisciplinary approaches and multi-stakeholder engagement needed to address global challenges and achieve the SDGs. But how can we make the most of this collaboration to have a greater impact on society, especially when looking at challenges that affect not only our two countries? Our ultimate aim is to accelerate the understanding and connections between institutional, and people-to-people linkages, to promote inclusive, high-quality knowledge exchange for societal progress on both the (inter)national as well as the regional scale. This includes finding opportunities for upscaling of collaboration and knowledge exchange to enhance intra-regional connectivity in both countries, as well as beyond the country borders to the level of the EU and ASEAN, in which our bilateral cooperative projects and their results can serve as inspiration and example.

WINNER 2023 will again be organised as a hybrid conference in which attendees are able to participate in online sessions and be inspired by existing and future collaborations. With you, the practitioners, being at the heart of this collaboration, we invite you to organise part of the programme. Please fill out the session registration form on the next pages and submit it to winner@nwo.nl before **6 June 2023**.

What you should know about the sessions

- The session will be online, most likely on the platform HopIn.
- The session should be jointly led by a Dutch and an Indonesian researcher.
- Session leaders are responsible for organising the speakers, work forms, and content of the sessions.
- Please make the session broader than just the work of your own research group. Keep in mind that someone from a different disciplinary background, or from outside academia, should also be able to follow your session.
- If you submitted a session last year, you are of course still welcome to submit a session idea this year!
- The session should be interactive. You are also very welcome to bring in your own ideas. If you need support for how to organise an interactive online session, you can email us at winner@nwo.nl
- In case all presenters can be physically together in one location which allows to broadcast the session online at the time of the conference, we may consider to include your session as a hybrid session. Please indicate this in your proposal.
- The digital WINNER conference will allow for 4 hours of interactive live sessions per day. We kindly request that you organize your session in such a way that it fits in a 75 minutes timeslot.
- If your session is suitable for recording and you don't have any objections against recording and later availability of the session on the WINNER website, please indicate this on the form.

WINNER
WEEK OF INDONESIA-NETHERLANDS
EDUCATION AND RESEARCH

- The programme for this digital edition will be smaller in the amount of sessions we can cater for than a full 'live' conference. Therefore, the organising committee might have to exercise its right to select which session ideas can be accommodated in this edition of WINNER. It will do this on the basis of the following:
  - A spread of topics and collaborations across the conference programme
  - Interactiveness of the session
  - Fit with the conference theme
  - Suitability for a wider audience

You may be asked to combine your session with another session idea. The organising committee will endeavor to communicate its feedback on your session idea before the end of June, 2023.

If your session is selected, we will ask you to provide a definitive title and description of your session, as well as the biographies and photos of the speakers for the website by June 30, 2023.

Please check www.winner.or.id for regular updates or email us at winner@nwo.nl.

If you need inspiration for a session theme, see the examples in Annex 2:

- Sustainability
- Climate Change
- Disruptive Technological Changes
- Language Diversity
- Higher Education Management
- Precision Healthcare

Contact details of the session organiser *

Name	Institution/Company
Email	Phone

☐ I confirm that the personal information in this form, including the photos of the speakers, can be shared among the members of the Coordinating Committee (NWO, BRIN, ALMI, the Dutch Embassy in Jakarta and Nuffic Neso Southeast Asia), who will use it to select between all submitted sessions to come to a balance of topics and Dutch-Indonesian collaborations, to maintain contact in preparation for and evaluation after the conference, and that the names, affiliations, short biographies and photos of the speakers can be published on the WINNER website.

The information below will be published in the program booklet of WINNER

The organizers reserve the right to edit and shorten the content

Envisioned number of participants

Please indicate how many participants you would ideally prefer to have or if there is a maximum number of participants you could facilitate, taking into account, for example, the work forms you would like to use. Also interactive online sessions work best if they are planned around an optimum number of participants.

Titles (short and long)

o   Each session should have a short title (preferably a maximum of 3 words) that can be used in the block schedule. If desired, a longer title can be used in the program booklet. Example:
short title: "women's rights"
long title: "Promoting women's rights: leadership and mobilization in the 21st century"

Short title:

Long title:

Description of session

o   Please include a description of the session for on the programme webpage. The text can be a max. 250 words
    Consider the following elements: link with Indonesia and the Netherlands, highlight opportunities and challenges
    for scaling up or wider regional impact, relevance of subject, target audience.

o   Please give a short description of the session format (e.g. roundtable, a hands-on workshop, a panel etc.)

o   Your session should be no more than 75 minutes.

Description (abstract) of the session for in the programme booklet (max. 250 words)

Description of the session & envisioned takeaways from the session (preferably in bullet points)
☐**Seminar**   ☐**Workshop**   ☐**Panel Discussion**   ☐**Exhibition**   ☐**Other** (please describe in the box below)

Stream selection (optional, you are allowed to highlight multiple options)

o **Stream 1 – Research on policy focus**

This stream will explore policies and strategies that can accelerate the knowledge connectivity between Indonesia and the Netherlands for research and education. It will also include discussions will cover how research can inform policy and regional connectivity for societal impact.

o **Stream 2 - Research focus**

Discussions on how research collaborations can contribute to regional connectivity for knowledge exchange, innovation, and societal impact, with other researchers as main target audience.

o **Stream 3 - Public-private partnerships in research**

Discussions will cover challenges and best practices in building successful PPPs as well as room for research projects where researchers and businesses worked together that can contribute to innovation, economic growth, and social development.

o **Stream 4 - Practical information and organisational focus**

Discussions will cover best practices, challenges, and opportunities in building strong educational networks that can contribute to knowledge connectivity and sustainable development. Thereby provide practical information on how to study in Indonesia or the Netherlands as an exchange student.

Who is the target audience of your proposed session? (Academics/researchers, policymakers, students, private sector practitioners, other?)

Speaker list

o Please provide an overview of envisioned speakers (please note: not all speakers need to be confirmed at this stage. Please consider the gender balance, different institutions, different research disciplines, and balance between Dutch and Indonesian speakers)

o Profile of the speakers (max. 100 words per person)

o High resolution pictures of the speakers for the WINNER website (as attachment in the email)

o Once the speaker is confirmed, we will ask you to confirm that the speaker has given permission for his or her name, organisation, photo and short biography to be published on the WINNER website.

Overview of envisioned speakers

Profile of the speakers (max. 100 words per person)

Recording of session for later availability on the WINNER website

☐ **I agree that my session can be recorded and uploaded on the WINNER website**
☐ **I do not want my session being recorded and uploaded on the WINNER website**

Any other comments on recording of sessions

WINNER
WEEK OF INDONESIA-NETHERLANDS EDUCATION AND RESEARCH

Annex 1: POSSIBLE WORK FORMS FOR INTERACTIVE SESSIONS

Please go to www.winner.or.id for more tips on how to organise an interactive online session. The suggestions below are examples of varying lengths. When adapting them for 75 minute sessions, keep in mind that listening attentively to a long presentation is more difficult online, so add interactive breaks between presentations or consider cutting a longer presentation into smaller segments and having discussion in between.

Masterclass – Presentation and interaction
In a masterclass, an expert from a knowledge institution, the government or industry provides an interactive insight into his or her expertise. A bold and daring speaker who we can learn from and above all is inspiring. The session is aimed at sharing knowledge and skills around a specific theme.

Possible structure: 10 minutes presentation + 5 minutes interaction +10 minutes presentation + 25 minutes interaction, supporting visual material via for example Prezi or PowerPoint

Best Practice – Presentation and interaction
The 'Best Practice' offers a platform for a successful research collaboration/consortium setup/mix of knowledge development and questions from the field. Proposals could also be made to realise a better process or organisation of exchange, for example something that can be presented to the participants as a concept and then be discussed.

Possible structure: 5 minutes introduction and audience interaction + 15 minutes explanation + 25 minutes questions

Workshop – Collaboration
In the workshop, the participants will work together on an issue under the supervision of a moderator. In an open, honest and reciprocal manner they will jointly explore the issue and actively exchange ideas about possibilities to solve a scientific or societal problem. The workshop works best if a moderator keeps an eye on the process, time and the outcomes.

Possible structure: 10 minutes introduction + 25 minutes working in groups + 15 minutes presentation to each other and discussion, + 5 minutes concluding the session

Debate in a debating chamber – Discussion based on a proposition and 'camps of proponents and opponents'
In a debating chamber setup you can discuss various propositions with the participants.

Possible structure: 10 minutes introduction and the debate rules + 30 minutes debate + 5 minutes concluding the session

Annex 2: Examples of themes

#1 Sustainability

This sub theme invites academics, researchers, and practitioners from The Netherlands and Indonesia to demonstrate their collaborative efforts in promoting environmental sustainability. From exploration of renewable energy, green economy, resource circularity, this sub-theme expects presenters to highlight the roles of international collaborations in the collective efforts to preserve and enhance the diversity and sustainability of resources.

#2 Climate Change

This sub theme invites academics, researchers and practitioners to showcase their collaborative projects in various fields to address climate change, from health, energy, food security to disaster management. It also expects researchers to highlight the roles of international partnerships in the collective efforts to tackle climate change.

#3 Disruptive Technological Changes

This sub-theme explores how international collaborations in research and education have been crucial in understanding, benefiting from and innovating on disruptive technological changes. It also explores how such collaborations can lead to wider impact, not only for the countries involved but also their respective regions.

#4 Language Diversity

This sub theme invites academics and researchers to exhibit their international collaborations on language diversity, especially in Indonesia. Serious and concerted efforts, including through international collaborations, are needed to prevent further losses of language diversity in the archipelago. This sub theme shall highlight the collaborations between Indonesian and Dutch linguists in documenting and revitalising the languages in the archipelago, thus preserving local knowledge and wisdom.

#5 Higher Education Management

There are multiple challenges that higher education institutions face in both the Netherlands and Indonesia, but also globally. Think of things such as (pressures on) academic freedom, how to create stability and lessen the precariousness of working conditions for (especially young) researchers, and the many different demands placed on academics' time. A session could consider reflecting on what Indonesia and the Netherlands can learn from each other on these topics, and what roles researchers, their institutions, and other organisations can play.

6# Precision Healthcare

This session invites presenters from Indonesia and the Netherlands to showcase their research on precision healthcare - how this new patient management has led to more specific and effective medical treatment and minimum side effects. It also expects presenters to highlight the importance of international collaborations in researching, promoting and enhancing precision healthcare.
